

# Analysing Cause and Consequence

- Decide what individuals, groups, and other conditions/social forces were involved, then consider to what extent they influenced the event or developments.
- Place an X inside the triangle to indicate the extent to which the event/development was influenced by these three factors.
- The closer the X is to one of the three factors, the more you think that factor was influential.

**1** Relevant conditions or other factors:

Draw your **X** in the triangle where you think it best explains the event/development

**X**

**2** Individuals involved:

**3** Groups involved:

**Explanation:** Why did you place the X where you did? What role did each of these factors play?
